

Boston
Thomas M. Marino, Mayor

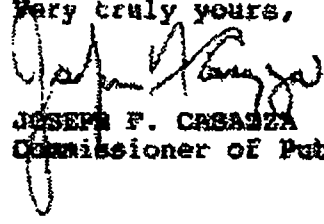

December 2, 1993

Dear Lord Jakobovits:

As Chairman of the Public Improvement Commission which is a unit of government which manages the space on, over and under the public highways of the City of Boston, we were therefore the body that was asked to give permission to allow the construction of an "ERUV" in the City of Boston.

Suffice it to say that when we understood the program, we were pleased to grant to the Orthodox Jewish Community permission to construct the "ERUV" and can report that its existence has not caused any problem for the Commission, the City of Boston, or the community at large.

Very truly yours,

JOSEPH F. CASAZZA
Commissioner of Public Works

JFC/jc
