17th May 1993

Dear Graham

We anticipate that however the appeal is dealt with, it will be essential to establish a significant need for the Eruv. As you are aware, a petition was gathered in respect of the original application. Its integrity was (outrageously) challenged during the Council meeting when a claim was made by Councillor Davis that following his inspection of the petition, he concluded that over 1500 signatories were from outside Barnet and that less than 200 people really supported the Eruv. As a result, I commissioned Stoy Hayward to conduct a thorough analysis. I enclose a copy of the audit certificate which has been issued, which speaks for itself. I will keep the original on my file.

Yours sincerely

David Schreiber

Dear David

Validation of the Barnet Eruv Petition

I have now completed the above and as a result I am therefore happy to enclose my firm's certificate together with the amended analysis of the petition results.

As you know from Adrian, the original analysis showed that there were 3,300 valid entries and as a result of my work this has been amended to show there to be 3,299 valid entries. The overall totals differ from the original analysis by only 1, but the individual number of entries per postal code area differed by up to 15.

If I can be of any further assistance then please do not hesitate to contact either Adrian or myself.

Kind regards,

Yours sincerely

A handwritten signature in black ink, appearing to read 'Malcolm Cohen', with a long horizontal flourish extending to the right.
