TO ESTABLISH A FIGURE FOR THE NUMBER
OF PERSONS WHO NEED THE 'ERUV'

Number of United Synagogue household memberships	=	4690
Number of Ner Yisroel household memberships	=	<u>56</u>
Total	=	4746

x 4746 by Mr J Lews' figure of 3.1 for average household size	=	14713
---	---	-------

+ Number of individual male and female memberships	=	<u>177</u>
--	---	------------

Giving total persons in membership	=	14890
------------------------------------	---	-------

Of the 1991 census figure for the total population of the wards which contain the eruv the % of those under 5 is 6.47%

6.47% of 14890 is		963
-------------------	--	-----

To establish a % figure for persons within population who are registered disabled take 1991 census total population within Barnet of 293564. With a figure of 7800 registered disabled in Barnet the % is 2.657%

. . 14890 - 963 = 13927 of which 2.65% =		370
--	--	-----

963 + 370 =	1333	However
-------------	------	---------

taking the Kalms report figure for the % of the United Synagogue members who are observant ie 10% the number of persons who 'need' the eruv is calculated to be

	133
--	-----

Note: The figures make a number of assumptions including:-

1. All members are within the eruv.
2. Average household membership size is 3.1 which is larger than the average household size of the wards which contain the eruv of 2.53.
3. All children under 5 are unable to walk unaided.
4. All registered disabled are unable to walk unaided.
