Dear Mr Schreiber,

Thank-you for the letter about the new EKUV proposal.

Although I have not seen the detail, if it is a revision of the first plan I am sure I will be supporting it. As I always said before, this is because I believe the scheme is acceptable on

planning grounds.

You, and in particular Laurence, knew my feelings about the wider issues but I remain of the view that I am a more effective advocate of the scheme if I stick to hard facts!

I went on the record as saying the wrong decision was made last time. I hope a revised plan is approved; The appeal process is a long and costly business, and to be avoided if possible.

I would be grateful if the contents of this letter remain private although you are welcome to convey my continuing support to your Committee!

With best wishes, Jane Ellison
