Dear Mr Murdoch

ERUV

Thank you for your letter dated 22 June 1998, concerning the current proposals for the establishment of an ERUV within this borough. Following the decision of the Development and Protection Committee to grant planning permission for the current proposals, and the request contained within your letter, I shall be preparing a report which will be submitted to the Public Works Committee. The report will not be submitted to the July meeting of that Committee as it is now too late for a report to go forward. It will be placed on the agenda for the September meeting. The report will seek authority to issue licences for the poles and wires to be placed on and over the highway.

As you are aware, the Council are the highway authority but this only applies to borough roads. The issue of licences for installing the poles and wires on and over trunk roads will be the responsibility of the Highways Agency.

It may be useful for us to meet within the next 2-3 weeks to determine whether there are any further matters to be resolved.

As you have kept me fully informed as to the amendments to the various locations contained in the current proposals, I do not believe that there will be any significant outstanding matters. However, if you would contact me I am sure that a meeting at this office would be useful, if only for the purpose of taking stock of the current situation.

Yours sincerely,

J Koster
Principal Engineer
for Director of Environmental Services
