Dear Mr. McGurrian,

PROPOSED ERUW - BARNET

Thank you for your letter dated 11th August concerning the new application for an eruw in Barnet.

Whilst the potential exists for birds to collide with a monofilament wire of the nature proposed, we are satisfied that whilst regretful, this would not have a significant impact on local bird populations. The RSPB therefore does not wish to raise an objection to this planning application.

I hope this clarifies our position and thank you once again for consulting us.

Yours sincerely,

R. Sinton
