First the good news. The application was approved 18 to 0 with 2 abstentions - honestly!! The two abstentions were Anita Campbell and David Williams. Even Frank Davis voted in favour.

The not so good news is that several sites were excluded from the approval. Some were new ones with specific objections raised by Sheila Scott including 41, 42, 45, and 47. In addition 13 (Wildwood Rd) was excluded because of confusion over the siting of a pole on Corporation of London land and 14 (Hampstead Lane) was excluded as the site as submitted is now in Haringey not Barnet. Although we'd put in revised plans for 13, 14 and 42 these could not be considered as there had not been time to consult.

Sheila Scott has offered to visit the sites with us in order to forestall future problems when the application comes back to the committee on the remaining sites. That will probably be the March 19th meeting as there will not be time to deal with everything for the next meeting on February 12th.

It would appear from the 18-0 vote that there is very little likelihood of the next application for the detailed permission running into serious difficulties. Let's hope that no new problems surface.

We now also have some more time to solve the fence problem. Please call me to give me your input on that. Laurence mentioned that he knows one of the freeholders of one of the blocks of flats.

Finally, in order to avoid having to go back to Public Works to deal with further changes, the application will not go to Public Works until we have full planning consent. Stan Cross told me once more that he does not foresee any problems with Public Works consent.

All the best!!
